

Lyfetre
—
the skilltree of life

Concept and Documentation

Feature Requests

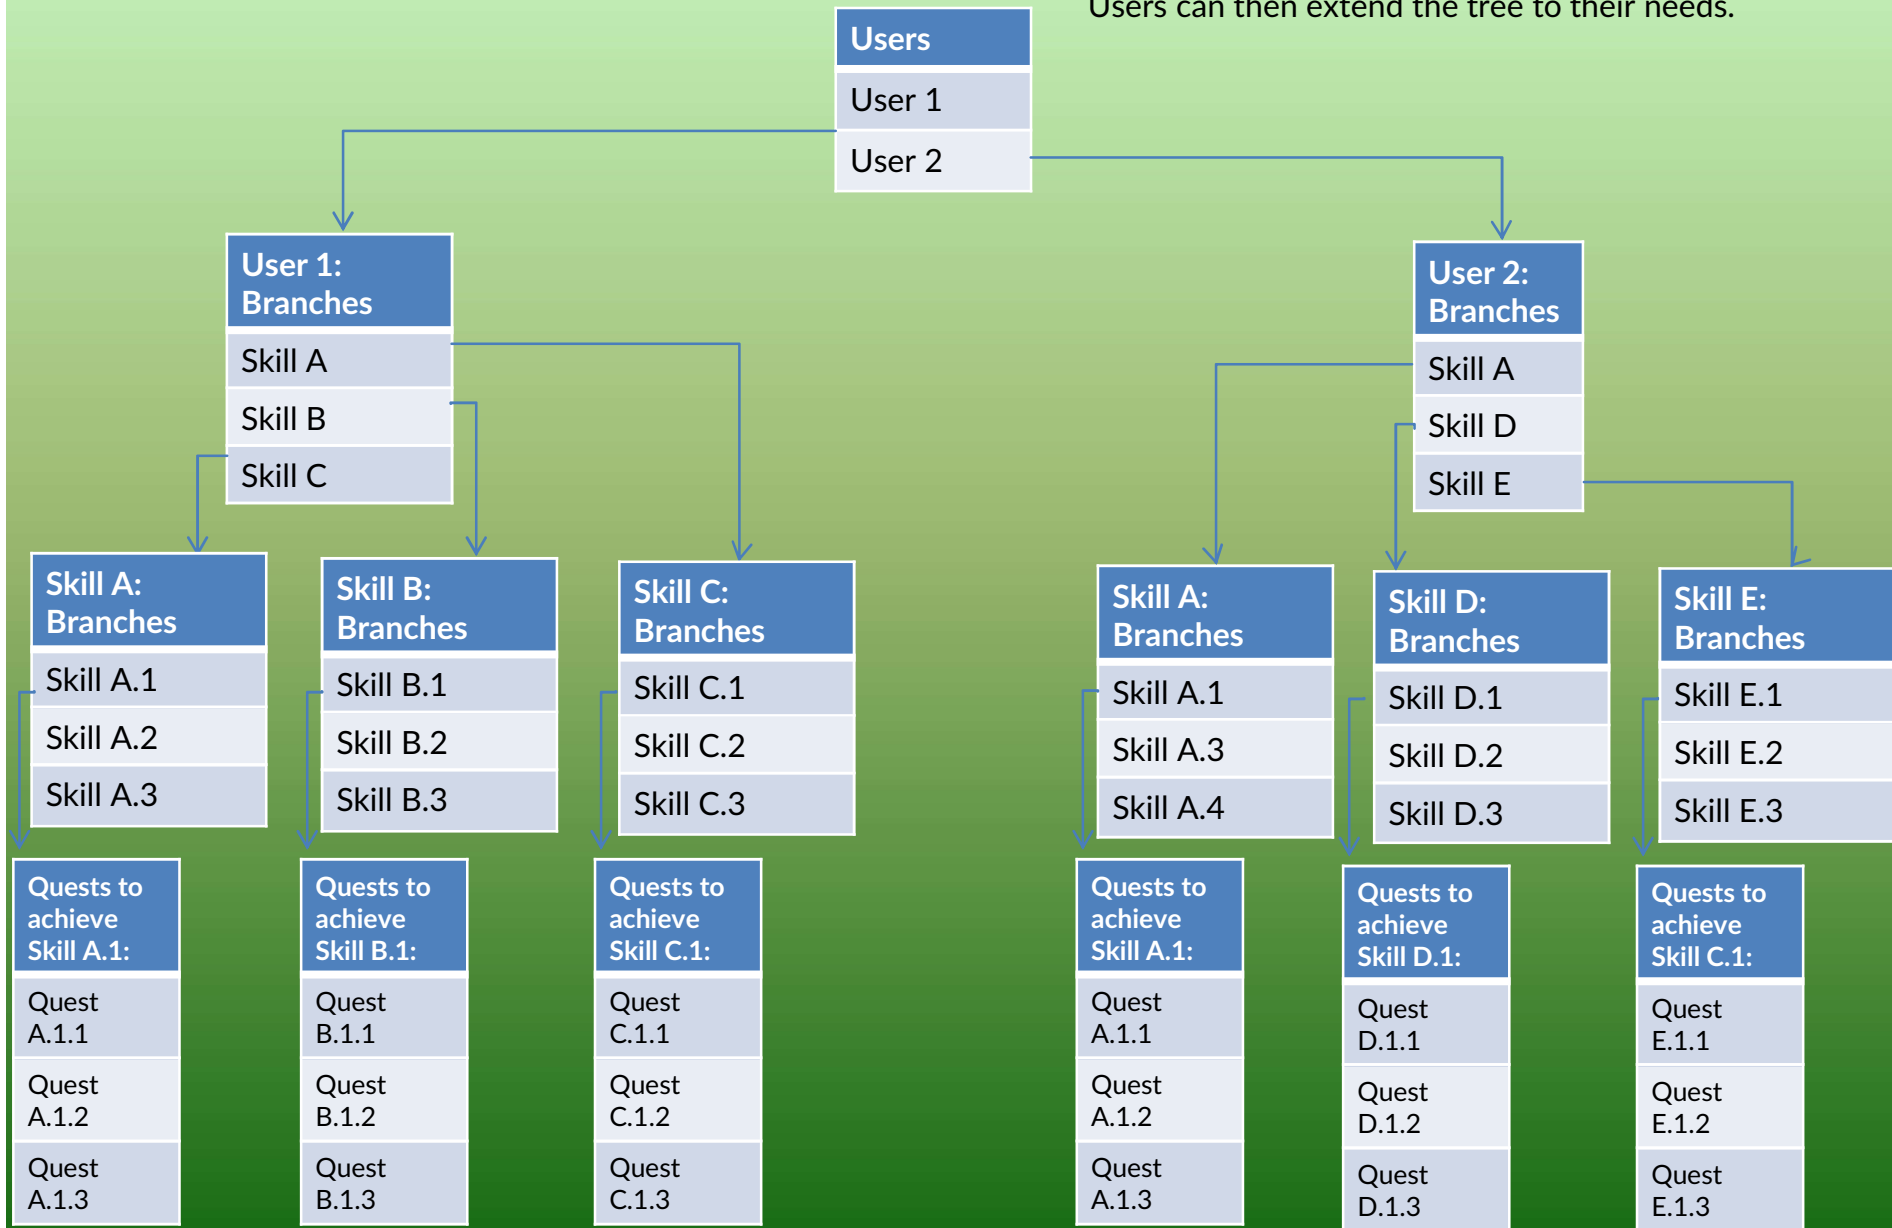

Feature Requests

- Lyfetree – the Skilltree of Life
 - Connect Skills/Memories to WAVs/MP3s/MP4s/GIFs (or even Social Media posts)
 - Customizable categories for users to create
 - Preset categories for users when they initialize an lyfetree
 - Date of creation/changes made to lyfetree/branches
 - Annual Review
-
- Daily To-Do List (Daily Quests), which user creates in the evening prior to the day or in the morning;
-
- Blog posts by lyfetree (maybe with, maybe without commenting function): Stories from users; monthly update of how many trees have been planted; tips for building your lyfetree
-
- Realtime (or close to realtime) planted trees counter on website

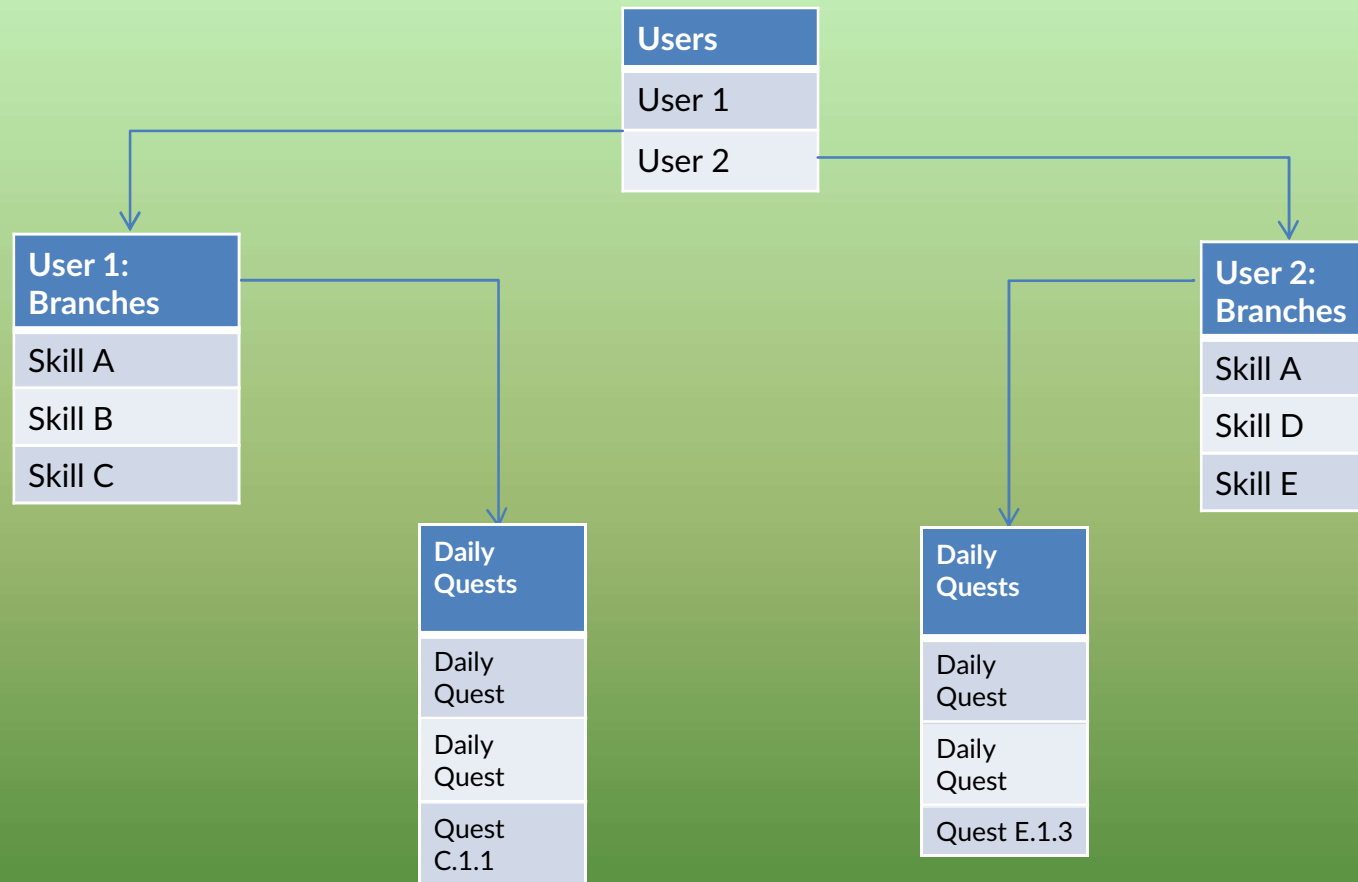

Data Model

Data Model

All skills are consolidated in a “general” database that is copied to every user with an initial tree creation. Users can then extend the tree to their needs.

Data Model

Daily Quests have their own list and only serve as a productivity function, to check off daily tasks. If technically possible, you can add Quests from your lyfetree (e.g. Quest C.1.1) to your Daily Quest List

Payment Model

Payment Model

- Pay 0,99ct per month (no advertisements, no spam, no nothing)
- a small percentage of the monthly payment goes inside a fund for planting trees
- The bigger your lyfetree gets, the higher that percentage is
- Additionally, a donate function where you can donate to us/the lyfetree fund (choose the percentage distribution with a slider)
